-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 30 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

Drawings

The drawings are objected to because in figures 1,9, reference numeral 27 is not directed to a computer as disclosed and many of the boxes in figures 1,2,4,9 are not properly labeled. Reference numerals alone are insufficient. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Objections

Claims 4-9 are objected to because of the following informalities: The language set forth in the claims is confusing. For example, it appears that the claims should set forth that tomogram creating step includes acquiring data for creating a first structural

tomogram. It is unclear as to how data is created and how that data is "about a tomogram". The term "radiation detect signal detected" appears to include redundant language. It appears that the claim should set forth radiation signal detected. The terminology "unbreathed state" and "breathed state" appears to be grammatically incorrect. The recitation of "correction information **of a tomogram**" is confusing. The language used in claims 6-8 is confusing. Claim 6 is confusing in that it implies that a plurality of radiation examining apparatuses are used which contradicts the disclosed invention. Claim 7 is confusing in that it implies that the same source is used to provide the first and second tomograms which is inconsistent with the disclosure. In claim 9, line 3, "a body" should be "the body". Appropriate correction is required.

Double Patenting

Claims 4-9 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-3, 10-14 of copending Application No. 10/253,489. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method is an obvious result of using the apparatus.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Balan et al disclose a combined gamma camera and CT imaging system wherein CT data acquired when the patient holds their breath is used to correct the image data obtained with the gamma camera. Townsend et al disclose a combined PET and CT imaging system.
